

adidas Group Policy for the Control and Monitoring of Hazardous Substances

A-01

September 1st 2011

adidas Group PROPRIETARY AND CONFIDENTIAL INFORMATION:

This document contains confidential information intended only for the use by the adidas Group and its authorised suppliers, subcontractors and materials suppliers. The recipient of this document shall not disclose any information contained herein to any person other than their employees who may need to use the information to comply with this policy.

 GROUP	Area Quality/SEA	Policy number A0145	Version 09	Page: 2 / 30
				Approval Date: August, 11
<h1>A-01</h1>				Effective date: Sep 1, 11
				Effective Until Sep 30, 12

Prologue

As a company, the adidas Group is committed to fair and sustainable business practices and we apply these to the selection of our business partners and of the materials used in our products.

1. We expect our business partners to respect and to adhere to the company's code of conduct, the "Workplace Standards" (see [Information Appendix](#)) that reflect the core values of the Group. These are general but concrete standards that are based on the International Labour Organization's (ILO) conventions and the model code of conduct of the World Federation of Sporting Goods Industries (WFSGI). The Standards lay out our requirements for labour, health, safety and environmental issues in our business partners' factories.
2. We expect our business partners to ensure that materials supplied to the adidas Group are in full compliance with actual local laws and regulations regarding environmental and product safety.
3. We require our business partners to avoid the intentional use of those substances which are listed in the A-01 requirements and to comply with best practice standards. We continuously monitor and control the compliance with our standards by conducting material tests in independent laboratories.
4. We actively encourage our business partners to take a proactive stance in improving the environmental impact of the materials they supply. Improving the environmental impact means to:
 - ensure that materials and components supplied are non-toxic in use and disposal and using them in manufacturing products does not involve toxic releases or damaging ecosystems.
 - strive to make materials which come from renewable and organic resources that are recyclable or biodegradable.
 - manufacture product components and materials under the best possible environmental conditions and to use the best available technology.
5. We do not source or process raw materials from any endangered or threatened species, as defined by the International Union for Conservation of Nature and Natural Resources (IUCN) in its red list. Our policy also prohibits using leathers, hides or skins from animals that have been inhumanely treated, whether these animals are wild or farmed.

In particular, we do not use

 - Any leathers from animals raised or slaughtered in India or China
 - Furs, hides or skins from exotic animals like crocodiles, snakes, sharks or fishes
 - Downs and feathers that are plucked from living geese or birds
 - Merino wool from sources where mulesing practices are still applied, regardless the country of origin
6. We consult with material suppliers, scientific organisations, governmental authorities and other stakeholder groups as well as conduct life cycle assessments to determine and evaluate the environmental impact or risks of new materials, technologies and products before their usage.

adidas Group PROPRIETARY AND CONFIDENTIAL INFORMATION:

<h1>A-01</h1>				Effective date: Sep 1, 11
				Effective Until Sep 30, 12

Elimination of Chemicals in Cement Systems or Finishes (e.g. Waxes, Polishes or Spot Cleaners) and solvent based Inks and Dyes

The chemicals listed in the following table are restricted from being used in cement systems or finishes. The supplier has to certify compliance with these requirements. The requirements apply to each single component used in the process – i.e. for the hardener itself and not for the mixed cement.

Substances	Required TLV
Tetrachloroethane, Trichloromethane (Chloroform), Dichloromethane, Tetrachloroethylene, Trichloroethylene, Toluene, Xylene, Methylphenol, Σ of NP, OP, NPEO, Dimethylformamide (DMFA), Cyclohexane, THF	0.1% (1000 ppm)
Phenol	10 ppm
Benzene,	5 ppm
MBT, DBT	1 ppm
TPhT	0.5 ppm
TBT	n.d.

The requirements are based on the EU-Directive EC 1907/2006 REACH and the German law for characterization of chemicals (GefStoffV).

In the frame of the VOC reduction program the adidas-Group strives to completely substitute solvent based inks and dyes by e. g. water based systems. In case, that due to special technical applications and quality requirements a substitution so far is not possible, all solvent based inks and dyes need to comply with the above defined table. Also adidas Group products may not emit more than 0.5 mg/m³ VOC's.

Material	Key Code
Miscellaneous	
Cotton laces	500
PA or PES laces	501
Laces PES / cotton	502
Laces nylon / cotton	503
Sockliner EVA foam	504
Sockliner rubber foam	505
Cellulose / wood (e.g. insole material)	506
Paper tissue / out cartons / box / QC labels / hangtags / wood threads	507
Inks, prints, repair colours	508
All metal parts	509
Applied surface coatings*	510
	511

* Material group 511 according to the official US-Definition of 16 CFR Part 1303:

“Paint and other similar surface-coating materials means a fluid, semi-fluid, or other material, with or without a suspension of finely divided coloring matter, which changes to a solid film when a thin layer is applied to a metal, wood, stone, paper, leather, cloth, plastic, or other surface. This term does not include printing inks or those materials which actually become a part of the substrate, such as the pigment in a plastic article, or those materials which are actually bonded to the substrate, such as by electroplating or ceramic glazing.”

This means e.g. that if a print or graphic can be removed by scraping without lifting up the underlying substrate, the print or graphic would be considered to be an applied surface coating.

Wherever possible by sample surface condition a quick test with XRF according to IEC 62321 is acceptable, additional testing with ICP is only required for results defined and listed in the standard itself / if needed CPSC test method applicable
 *Acknowledging possible still occurring peak concentrations of lead in metal parts, single findings/concentrations up to 90 ppm may be accepted on interim base. These acceptances are single case to case decisions, Quality/Technical Service in consultation with the respective Product Safety management may decide on those. On-going failures may be judged as systematic supplier incompliance, and fall under the "Rejected Materials" paragraph of the A 01.

Dimethylfumarate (DMF)					
	TLV Infants (Size ≤ 10,5 k UK footwear; ≤ 92 apparel)	TLV Adults	Test report required for separate colours	Pre-Treatment	Test Method
Application	0.1 ppm	0.1 ppm	No	Ultrasonication with ethylacetate at 70°C	GC/MS
Materials to be tested / certified (explanation see PART 4):					
<p>The Biocide Dimethylfumarate (DMF; CAS-Nr. 624-49-7) has been banned for all consumer products, so no product or any part of it should contain more than 0.1 ppm. In the sporting goods industry DMF applications might be found as additional anti-moulding agent in Silica-gel pads and sachets which are added to products or boxes/packaging to basically absorb humidity. It is therefore strongly recommended to stay away from any use of such Silica-gel pads and sachets, which then helps to avoid according to best knowledge any risk to find DMF within our product lines and shipments. In cases, and only on special consumer request those sachets are in use, these pads need to be tested according to the above described parameters.</p>

Information

The adidas Group “WORKPLACE STANDARDS”

PERFORMANCE PASSION INTEGRITY DIVERSITY

These are the core values found in sport. Sport is the soul of the adidas Group. We measure ourselves by these values, and we measure our business partners in the same way.

Consistent with these values, we expect our partners – contractors, subcontractors, suppliers, and others – to conduct themselves with the utmost fairness, honesty and responsibility in all aspects of their business.

We use the adidas Group *Workplace Standards* as a tool to assist us in selecting and retaining business partners who follow business practices consistent with our policies and values. As a set of guiding principles, the *Workplace Standards* also help identify potential problems so that we can work with our business partners to address issues of concern as they arise. Business partners will develop and implement action plans for continuous improvement in factory working conditions. Progress against these plans will be monitored by the business partners themselves, our internal monitoring team and external independent monitors.

Specifically, we expect our business partners to operate work places where the following standards and practices are implemented:

General Principle

Business partners must comply fully with all legal requirements relevant to the conduct of their businesses.

Employment Standards

Forced Labour

Business partners must not use forced labour, whether in the form of prison labour, indentured labour, bonded labour or otherwise. No employee may be compelled to work through force or intimidation of any form, or as a means of political coercion or as punishment for holding or expressing political views.

Child Labour

Business partners must not employ children who are less than 15 years old, or less than the age for completing compulsory education in the country of manufacture where such age is higher than 15.

Discrimination

Business partners must not discriminate in recruitment and employment practices. Decisions about hiring, salary, benefits, training opportunities, work assignments, advancement, discipline and termination must be based solely on ability to perform the job, rather than on the basis of personal characteristics or beliefs, such as race, national origin, gender, religion, age, disability, marital status, parental status, association membership, sexual orientation or political opinion. Additionally, business partners must implement effective measures to protect migrant employees against any form of discrimination and to provide appropriate support services that reflect their special status.

Wages & Benefits

Wages must equal or exceed the minimum wage required by law or the prevailing industry wage, whichever is higher, and legally mandated benefits must be provided. In addition to compensation for regular working hours, employees must be compensated for overtime hours at the rate legally required in the country of manufacture or, in those countries where such laws do not exist, at a rate exceeding the regular hourly compensation rate.

adidas Group PROPRIETARY AND CONFIDENTIAL INFORMATION:

This document contains confidential information intended only for the use by the adidas Group and its authorised suppliers, subcontractors and materials suppliers. The recipient of this document shall not disclose any information contained herein to any person other than their employees who may need to use the information to comply with this policy.

 GROUP	Area Quality/SEA	Policy number A0145	Version 09	Page: 30 / 30
				Approval Date: August, 11
<h1>A-01</h1>				Effective date: Sep 1, 11
				Effective Until Sep 30, 12

Wages are essential for meeting the basic needs of employees and reasonable savings and expenditure. We seek business partners who progressively raise employee living standards through improved wage systems, benefits, welfare programmes and other services, which enhance quality of life.

Working Hours

Employees must not be required, except in extraordinary circumstances, to work more than 60 hours per week including overtime or the local legal requirement, whichever is less. Employees must be allowed at least 24 consecutive hours rest within every seven-day period, and must receive paid annual leave.

Freedom of Association & Collective Bargaining

Business partners must recognise and respect the right of employees to join and organise associations of their own choosing and to bargain collectively. Business partners must develop and fully implement mechanisms for resolving industrial disputes, including employee grievances, and ensure effective communication with employees and their representatives.

Disciplinary Practices

Employees must be treated with respect and dignity. No employee may be subjected to any physical, sexual, psychological or verbal harassment or abuse, or to fines or penalties as a disciplinary measure.

Business partners must publicise and enforce a non-retaliation policy that permits factory employees to express their concerns about workplace conditions directly to factory management or to us without fear of retribution or losing their jobs.

Health & Safety

A safe and hygienic working environment must be provided, and occupational health and safety practices which prevent accidents and injury must be promoted. This includes protection from fire, accidents and toxic substances. Lighting, heating and ventilation systems must be adequate. Employees must have access at all times to sanitary facilities which should be adequate and clean. Business partners must have health and safety policies which are clearly communicated to employees. Where residential facilities are provided to employees, the same standards apply.

Environmental Requirements

Business partners must make progressive improvement in environmental performance in their own operations and require the same of their partners, suppliers and subcontractors. This includes: integrating principles of sustainability into business decisions; responsible use of natural resources; adoption of cleaner production and pollution prevention measures; and designing and developing products, materials and technologies according to the principles of sustainability.
